The form has a blue border and a red title at the top: "Add New PitStop!". Inside, there are three input fields for address: "Street Address", "City, State", and "Neighborhood". Below these is a section for "Features" with two columns of checkboxes:

<input type="checkbox"/> Changing Table	<input type="checkbox"/> Purchase Required
<input type="checkbox"/> Accessible	
<input type="checkbox"/> Gender Neutral	

Under "Hours", there are three options: "open", "close", and "24 hour". At the bottom is a large red "Add" button.

User Stories

- i. User wants to find a restroom for their child to use.
- ii. User finds a new restroom and wants to add it to the list to help others! yay!
- iii. User discovers that a cafe requires a purchase to use their restroom, and they want to update an existing entry.
- iv. User finds an outdated entry & wants to delete it.

MVP & Possible Stretch Goals

MVP: A web application that allows a user to find, add, and edit publicly available restrooms in their current location.

- Possible Stretch Goals:**
- Add Google Maps API integration to allow user to see restroom locations on a map
 - Allow users to add new entry directly to Google map
 - Add "flag" function to remove entries instead of a hard delete
 - Change edit/add pages to modals
